**Consultants Findings and Recommendations:**

---

Service Delivered by: **TAYLOR REGIONAL HOSPITAL**  
Service Delivered Date: **01/11/2007**

Recommendations Notes:

**OPINION: 1- RIGHT LOWER NECK/SUPRACLAVICULAR SOFT TISSUE MASS LIKELY REPRESENTING METASTATIC ADENOPATHY. 2- RIGHT UPPER LOBE LUNG MASS WITH EXTENSIVE RIGHT PARATRACHEAL MEDIASTINAL LYMPHADENOPATHY. THE FINDINGS ARE MOST CONSISTENT WITH BRONCHOGENIC CARCINOMA WITH METASTASIS TO THE MEDIASTINAL AND RIGHT SUPRACLAVICULAR LYMPH NODES.THE POSSIBILITY OF SMALL CELL CARCINOMA SHOULD BE CONSIDERED.NEGATIVE CT SCAN OF THE ABDOMEN SHOWING NO DEFINITE EVIDENCE OF METASTATIC DISEASE IN THE ABDOMEN. BILATERAL LOW DENSITY KIDNEY MASSES ARE PRESENT WHICH MOST LIKELY REPRESENT INCIDENTAL RENAL CYSTS.THIS IS TO BE CONFIRMED WITH U/S IF THEY ARE FELT TO BE A CLINICAL INDICATIONS.**

Date Consultation Closed: **01/22/2007**  
Outcome: **SERVICE COMPLETED**
